

PAUL-JASPER SAHR

SOLUTIONS ARCHITECT, FULL-STACK ENGINEER AND DESIGN THINKER

📍 Oldenburg, Germany ✉ mail@pauljasper.dev 🌐 pauljasper.dev

PROFESSIONAL SUMMARY

Senior Solutions Architect & Full-Stack Engineer shipping production-grade industrial software on AWS. Architecting and building scalable serverless applications and GenAI solutions with Next.js, TypeScript and Python. Leading technical initiatives at a major automotive joint venture, taking projects from concept to deployment while mentoring teams. Certified Scrum Master and Design Thinking Practitioner.

PROFESSIONAL EXPERIENCE

Senior Solutions Architect & Full-Stack Engineer *inpro*

since 01/2025
Berlin, Germany

- **Rule Mining :**
 - Led development of a web app to extract technical rules from unstructured documents
 - Made key technical decisions, designed the system architecture, conducted code reviews and mentored a team of 2 developers
 - Built serverless infrastructure on AWS with SST and automated testing and deployment pipelines in GitLab
 - Worked closely with the non-technical project manager to ensure the project vision was met

Tech: Next.js, TypeScript, Python, Drizzle, tRPC, TanStack Query, better-auth, Tailwind CSS, Docker, AWS, SST, SQL, GenAI

Developer *inpro*

09/2022 - 12/2024
Berlin, Germany

- **Factory Chatbot :**
 - Built a shop-floor chatbot with Nuxt frontend and Python backend with RAG
 - Created a data ingestion pipeline to index and embed documents for retrieval
 - Developed an internal web app for testing and benchmarking the RAG system
 - Deployed infrastructure to AWS with CDK and set up CI/CD pipelines in GitLab
- **Text2Tech (BMBF funded) :**
 - Built the frontend for a technology monitoring demonstrator that uses deep learning to extract information from automotive industry texts
 - The system automatically identifies technologies, companies, and their relationships from German and English sources

Tech: React, TypeScript, Docker, GenAI

Junior Developer *inpro*

08/2020 - 08/2022
Berlin, Germany

- **Virtual Process Chain :**
 - Developed a C++ desktop application for data transfer between CAD/CAE systems
 - Created Python bindings for the library and integrated computer vision for scan mapping
 - Served as Scrum Master for the development team
- **hypro (BMBF funded) :**
 - Built a Cadmould data input module for importing injection molding simulation data
 - Developed data mapping to transfer fiber orientation information from Cadmould simulations to Abaqus mesh
 - Created result evaluation in Python
 - Attended project meetings to present progress and findings

Tech: C++, Python, Qt, cmake, Scrum Master

PROJECTS

- **gemhog.com :**
 - We listen to financial podcasts so you don't have to.
 - Investment ideas, trends, and expert takes — delivered to your inbox.
 - Pairs podcast theses with accessible financial data for evaluation
- **Real Estate Calculator iOS App :**
 - Building an iOS app that simplifies real estate calculation for investment
 - Development stalled

Tech: Next.js, TypeScript, Effect-TS, SST, Postgres, AWS

Tech: Expo, TypeScript, React Native, Hono, Drizzle, tRPC, TanStack Query, SST, Nativewind

CERTIFICATIONS

AWS Certified Machine Learning Engineer - Associate <i>AWS</i>	2025	AWS Certified Solutions Architect - Associate <i>AWS</i>	2025
Git Advanced Topics <i>GROSSWEBER</i>	2023	Professional Scrum Master I <i>Scrum.org</i>	2023
Clean Code C++ <i>GROSSWEBER</i>	2022	Design Thinking Practitioner <i>launchlabs Berlin</i>	2021
Improving Deep Neural Networks <i>Coursera</i>	2020	Neural Networks and Deep Learning <i>Coursera</i>	2020
Machine Learning <i>Coursera</i>	2020		

EDUCATION

University of Applied Science Münster *M.Sc. Chemical Engineering*

2016 - 2020

- **Master's Thesis Student :**
 - At University of Berlin, I developed and implemented a viscoelastic fluid model in OpenFOAM's C++ codebase to simulate free-rising bubbles
 - Modified the bubbleInterTrackFoam solver by implementing an extra stress tensor and adapting the viscoelasticModel library
 - Performed pseudo-2D and 3D simulations to validate the implementation and optimize numerical parameters
 - I created visualizations and graphs with Python
- **Research Trainee :** 6-month traineeship at Universidad de Cadiz
- **Research Assistant :** At the University of Applied Science Münster

University of Applied Science Münster *B.Sc. Chemical Engineering*

2012 - 2015
